

OLAKUNLE ESURUOSO

Full-Stack Developer | Web | Mobile | Systems

Lagos, Nigeria | 08106124552 | fkunzy@gmail.com | github.com/notkunz

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building web platforms, mobile applications, and backend systems. Experienced in designing, developing, and deploying complete digital products independently—from company websites to full-featured applications. Comfortable serving as the sole technical resource within an organization, managing everything from frontend interfaces to databases, integrations, and deployment infrastructure.

TECHNICAL SKILLS

Web	Next.js, React, HTML5, CSS3, Bootstrap, JavaScript, TypeScript, Tailwind CSS
Mobile	Flutter, Dart (Android and iOS)
Backend & Database	Supabase, PostgreSQL, Firebase, REST APIs, PHP, MySQL
Tools & Deployment	Git, GitHub, Vercel, Netlify, VS Code

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

2021 – Present

- Designed and built websites and web applications for businesses across different industries, managing projects end to end.
- Independently handled client requirements, UI design, development, deployment, and ongoing technical support.
- Built a corporate website for an architecture and construction firm with service pages, portfolio gallery, and contact integration.
- Built a pharmacy website with a product catalogue, service pages, and customer ordering through WhatsApp integration.

Founder & Lead Developer — Apex IoT

2023 – Present

- Sole engineer on a commercial smart-home platform, managing hardware, mobile applications, and cloud infrastructure simultaneously.
- Built a Flutter mobile application with real-time device control, live sensor monitoring, and remote management features.
- Took full technical ownership across product design, implementation, maintenance, and iteration.

SaaS Developer

2024 – Present

- Built ChurchOS, a web platform for member management, attendance, finances, communications, and automated reporting.
- Built a multi-tenant hotel operations platform with real-time order management, room access control, and live status tracking across multiple properties.

WHAT I BRING TO A COMPANY

- Professional websites tailored to a company's brand, audience, and requirements.
- Mobile applications for Android and iOS serving customers or internal teams.
- Real-time web dashboards for managing operations, users, and business data.
- Third-party integrations including maps, payment gateways, and push notifications.
- Full technical ownership: building, maintaining, improving, and scaling products over time.
- A single point of contact for technical needs, minimizing outsourcing and handoffs.

EDUCATION

B.Sc. Mathematics and Computer Science

National Open University of Nigeria | 2022 – Present
